

ENVIRONMENTAL POLICY

PurePower Technology (a Stanadyne[®] company) is committed to **environmental compliance** and **continual improvement** in our environmental performance. We will meet or exceed applicable environmental laws, regulations, and other requirements, including customer and other applicable commitments. Compliance is a minimum standard and is the shared responsibility of all employees.

OUR ENVIRONMENTAL PRINCIPLES

1. COMPLY

Comply with all applicable environmental laws, regulations, and other requirements. Compliance is our foundation.

2. PREVENT POLLUTION

Prevent pollution by using processes, materials, and technologies that minimize environmental impacts and waste generation.

3. CONSERVE RESOURCES

Conserve natural resources through efficient use, reuse, and recycling of materials, water, and energy.

4. SET AND ACHIEVE OBJECTIVES

Establish measurable environmental objectives and targets, monitor performance, and review results to drive continual improvement.

5. ENGAGE AND EMPOWER

Engage, train, and empower employees and business partners to act responsibly and support our environmental goals.

6. CONTINUAL IMPROVEMENT

Continuously improve our Environmental Management System to enhance environmental performance and reduce risk.

ISO 14001 COMMITMENT

We are committed to the requirements of ISO 14001 and to maintaining an effective Environmental Management System that supports environmental compliance, prevention of pollution, and continual improvement.

Senior management has the primary responsibility for implementing this policy, providing necessary resources, and establishing and supporting programs to achieve our environmental commitments.

Chris Selzler

Chief Operating Officer

PurePower Technology (a Stanadyne[®] company)
